

## **Environmental Health Services Disruption**

Over the holiday weekend, a water line burst in the building that stores our county well and septic records. Fortunately, no records were damaged during the incident. However, the space does need work and as such our staff will not be able to work there until the damage is fixed. We expect delays in responding to well and septic information requests while repairs take place. We apologize for this inconvenience and hope to have this issue resolved soon. We thank you for your understanding and wish you a Happy New Year.
